

CALLS WIFE "BOSS," BUT SEEKS DIVORCE

Marriage Code Written by Beverly Towles, Illustrator, Exhibited in Court

PROMISED HER HIS SALARY

New York, Sept. 29.—Husbands—also wives—attention! How does the following code, written by Beverly Towles, illustrator and advertising man, impress you? "My Duty to My Wife."
"My wife comes first before everything and everybody and shall have my salary every week."
"She shall be boss of the house and shall have everything to say about home life, like pleasures and comforts; must have attention, such as outings and theatres when we can afford them."
"No swearing or insults or rude treatment around the home."
"No slobbering or love-making to other women around the house, or call-

ing on or corresponding with other women.
"No argument or mentioning anything that has happened in the past, which must be forgotten forever."
"You can have your friends and go around with them, but they must be respectable, and you cannot go with people I object to. This means women only."
"Sounds fair enough, doesn't it?"
But in spite of the code, Mr. Towles and his wife, Marie Jacobson Towles, are at odds. She has sued for separation in the New York Supreme Court and is receiving \$20 a week temporary alimony. In the New Jersey Chancery Court he has sued her for divorce, alleging desertion. Their home formerly was at Keyport, N. J., where Mr. Towles, acting as his own designer and carpenter, built a handsome little bungalow.
It was in Mrs. Towles' answer to the divorce suit, denying that she deserted her husband, that their family code came to light yesterday.
"The code, Mrs. Towles swore in her affidavit, was written in September, 1919, by Mr. Towles and is a proof that they were living together at the time, although the husband swears her desertion occurred in 1918.

HICKORY WAIST AND GARTERS

JUST WHAT YOUR GIRL OR BOY NEEDS
The Hickory is just the garment you've always wanted—that's why the better stores show them first. Body made of fine mercerized sateen—wears well and washes wonderfully. POISON CAUSED DEATH

Clue Found in Los Angeles Cellar Murder Mystery
Los Angeles, Sept. 29.—Jacob C. Denton, wealthy retired mine owner, died yesterday. He was virtually choked by a poison. Denton's body was found walled up in a closet in the basement of his home.
Prof. Arthur Maas, who is conducting the examination, said yesterday that the comparatively well-preserved condition of the organs given him to examine would lead him to the conclusion that a poison was administered.
Mayor Snyder, of Los Angeles, took charge of the police investigation. The police have been unable to establish a

motive for the crime. Examination of Denton's safety deposit box disclosed that his stocks, bonds and jewels were intact.
The City Council yesterday offered a reward of \$1000 for the capture of the slayer.
MEXICAN AGITATORS CITED
Colonel Dismissed From Army for Assisting in Demonstration Mexico City, Sept. 29.—(By A. P.) Colonel Filiberto Villareal has been dismissed from the army for having participated in Sunday's demonstration, during which incendiary speeches were delivered from the central balcony of the National Palace. Three members of the Chamber of Deputies and Luis

Morones, a former Carranza agent, have been cited before the federal courts by the attorney general for the same offense.
Many telegrams from all parts of the world have been received asking information as to the government's attitude regarding the demonstration. Provisional President de la Huerta has replied by means of a circular telegram, in which he declared the original aims of the demonstration were legal, but that agitators had seized an opportunity to deliver seditious speeches.

California Pioneer Dies San Francisco, Sept. 29.—(By A. P.)—W. W. Montague, pioneer Californian, executive committeeman of the Vigilantes and a San Francisco manufacturer, is dead at his ranch in Santa Clara county today, one week before his ninety-third birthday. He was born in Caserevia, N. Y., and came here in the early fifties.

STURDILY built—designed for power and dependability, possessing grace and beauty in every line—the new Buick Nineteen Twenty One series signally upholds the traditions that have made the name Buick a notable word in the automotive industry.

Twenty One series is notable for the harmonious blending of low, graceful body lines; in appointments, for those added refinements that so materially increase the pleasure and comfort of motoring.

In addition to the general features of the new models the Buick Five-Passenger Touring Car (Twenty One Forty Five) possesses a roominess of tonneau and new arrangement of seating that afford occupants the utmost in riding comfort. For the business man or his family; for the needs of city driving or country driving, this model excels because of its capacity for varied service.

Two decades have more than justified the unwavering fidelity to the accepted engineering ideals to which Buick stands committed. The same rugged Valve-in-Head motor refined is a distinguished feature of every model.

Make this test in your filing department

HOLD a watch on your file clerk the next time you ask for a letter. Make several tests—then strike an average.

If the average time required to produce a letter is more than ten seconds, then your filing department needs immediate attention.

Actual time-tests have been made in a number of Philadelphia offices equipped with the "Y and E" Direct Name Filing System.

The average time required for finding a letter in these Philadelphia offices is exactly 8 1/2 seconds!

Ask for our new book, "Finding and Filing in Less than Ten Seconds."

Resinol

to that friend with skin trouble

If you have a friend suffering with skin or other itching, burning trouble, what greater kindness could you do him than to say:

"Why don't you try Resinol? I know you have experimented with a dozen treatments, but I believe Resinol is different. It does not claim to be a 'cure-all'—simply a soothing, healing ointment, free from all harsh drugs, that physicians prescribe widely in just such cases as yours. Do get a jar today!"

Resinol ointment is sold by all druggists.

Near East Relief Worn Clothing Committee

A paint for your ceilings and walls

- which:—
1. Will not collect dirt
 2. Will not flake off
 3. Is guaranteed to remain white longer than any other gloss paint

ALL flat paints have a rough, porous surface that collects dust and dirt. Ordinary gloss paints soon turn yellow. Cold water paints chip and scale.

Thousands of factory managers have found in Barreled Sunlight a paint that has stood every test of time.

Barreled Sunlight will remain white longer than any other gloss paint on the market. Our exclusive process enables us to make this an actual guarantee.

The smooth glossy surface of Barreled Sunlight is highly resistant to all forms of dust and dirt, and when soiled after years of service it may be washed clean like tile. Its elastic

composition withstands the shock and jar of the heaviest machinery.

Actual tests show that Barreled Sunlight when applied costs less per square yard than any other mill white.

Flows easily from the brush. Won't clog a spray, as it contains no varnish. Sold in barrels, also in cans.

Send for our booklet, "More Light," and free panels to make the test shown at left.

For shop and home, too

Barreled Sunlight is also used in countless institutions, stores, garages, small buildings and in rooms in the home—wherever a white, tile-like finish is desirable. It is much cheaper than enamel and easier to apply. Sold in gallons, half-gallons, quarts, pints and half-pints.

Cause and Effect of carbon in your cylinders

"THE BURNING TEST"

shown on the left, proves that compounded motor oils leave a sticky tar in your cylinders—the chief cause of carbon deposit. Scored cylinders and pistons, clogged valves, loss of power, etc., are certain results.

Sunoco Motor Oil eliminates carbon troubles

Carbon on piston heads, valves, spark plugs, etc.—one of the most common sources of trouble and expense to motorists—is chiefly caused by compounded motor oils.

Compounded oils are made by mixing light oils with heavy residual oils called cylinder stock. "The Burning Test" shows what happens to a compounded oil in your combustion chambers.

The light oil of the compound burns off quickly, leaving a thick, sticky tar. This residue not only fails to lubricate, but sticks to metal parts and holds dirt and impurities of combustion that should pass out through the exhaust.

What is the result? The furnace heat generated by the exploding gases transforms this tarry mass into hard carbon deposit. Every motorist knows what carbon does to his engine.

Sunoco Motor Oil eliminates carbon troubles because it is a non-compounded, 100 per cent distilled oil, absolutely free from carbon-forming elements. It is made in six distinct types.
